

Quatro

An Original Game from Gaya - The Art Of Thinking

Strategy game for two players, ages 6 and up.

Content:

Game board

21 light colored pieces

21 dark colored pieces

7 wooden pins

Objective:

To get four pieces of your color in a vertical, diagonal or horizontal line.

Preparations:

1. The players sit across from each other with the playing board in between them.
2. Each player receives 21 pieces of the same color.
3. The 7 wooden pins need to be inserted into the bottom frame as directed in the picture.

Process of the game:

You randomly decide who goes first.

Each player in their turn can make one of two moves:

1. Place one piece where ever they want on the board
2. Remove **one** of the pins from the bottom frame. The pin is then removed from the game.

When you remove a pin, all the pieces above it fall down and so change the whole board.

Both players have the opportunity to remove a pin at the beginning of each turn, There for one player may remove more pins then the other.

The piece that falls to the bottom of the frame can no longer be part of the game.

The first player to get four pieces of their color in a horizontal vertical or diagonal line is the winner.
