

# The Wall

A game for a single player or for multiple players

## Content:

1 Wooden Board  
44 Wooden Bricks  
1 Wooden Dog  
1 Wooden Cat  
2 Wooden sticks

## Subject:

Collect as many bricks as possible without bringing down the cat or dog.

## Preparation:

Arrange the bricks on the wooden board and place the dog and the cat on top of the highest row according to the sketch.

Player decides who goes first and the order of playing.

## Playing the Game:

Each player tries to pull a brick from the wooden board (using the stick is optional). Players keep the bricks for scoring at the end of the game. Be careful – if you drop more than one brick then all the bricks dropped, but one will pass to the next player.

Playing the single player version: try to take out at least 30 bricks, one by one, without dropping the dog or cat.

## End of the game:

Once a player dropped the dog or the cat the game ends.

## Scoring:

Players count their bricks.

The player who dropped the dog or cat does not get any points.

The player with the highest number of bricks wins the game.
